Caution

Metra recommends disconnecting the negative battery terminal before beginning any installation. All accessories, switches, and especially air bag indicator lights must be plugged in before reconnecting the battery or cycling the ignition.

**NOTE: Refer also to the instructions included with the aftermarket radio.*

KNOWLEDGE IS POWER

(Figure A)

(Figure B)

(Figure C)

Dash Disassembly

4. Unscrew the 4 Phillips screws securing the radio into the dash, unplug and remove the radio. (Figure D)
5. Remove the four screws securing the display into the factory panel and unclip the hazard button. Both items will need to be installed into the 95-7344 kit panel. (Figure E)

Continue to kit preparation

(Figure D)

(Figure E)

Kit Preparation

1. Install the hazard button and display previously removed from the factory radio panel. (Figure A)
2. Attach the four included panel clips to the radio panel. (Figure A)

Continue to kit assembly

(Figure A)

Kit Assembly 95-7344

Double DIN head unit provision

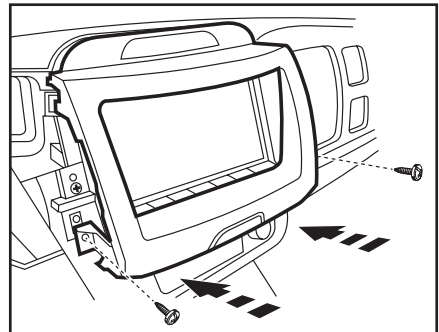

1. Locate the factory wiring harness in the dash. Metra recommends using the proper mating adapter from Metra or AXXESS. Re-connect the negative battery terminal and test the unit for proper operation.
2. Mount the radio to the DDIN brackets using the screws supplied with the radio. (Figure A)
3. Mount the radio/bracket assembly into the dash. (Figure C)
4. Snap the radio trim plate over the radio/bracket assembly and reassemble dash in reverse order of disassembly. (Figure C)
